

Agriculture Diploma

16-19

Agriculture is arguably the most important industry in the world and makes a significant contribution to the economy in the South West of England. Without food we simply would not survive and the growing world population is making increasing demands on the agricultural industry. Agriculture is a highly technical, scientific and mechanised industry that needs the best young people to work both on farms and in the allied industries as advisors, consultants and technicians.

This course is ideal for those looking for a career in agriculture or allied industries whether you are from a farming background or not. Level 3 is an advanced level programme equivalent to A levels, providing UCAS points and progression to university undergraduate programmes. The programme is aimed at individuals with a keen interest in agriculture and a desire to develop a greater understanding of the knowledge and skills required to be successful in the industry. Agricultural science and business skills are taught alongside the key practical skills and knowledge required by the industry.

As well as utilising the college farm and estate you will have the opportunity to meet and work with key farmers and industry specialists from across the region to enhance your experience and expose you to a wide range of agricultural production systems and management decisions.

You will be learning from experienced agriculturalists both inside the classroom and on the college farm, it could be milking our herd of dairy cows, lambing our flock of sheep or ploughing a field before we plant our maize crop. You will spend some of your course time working alongside the farm staff, following the farm activities as you progress through the year, you could be selecting ewes for breeding in September, fencing in October, calving cows in February or shearing a ewe in May.

You will have the opportunity to develop your confidence, knowledge and practical skills, alongside more general skills required to gain employment or to continue in education. As a level 3 course this diploma is all about you gaining an in-depth and broad understanding of the knowledge and skills required by the agricultural industry.
